MANY ASCD members have expressed a need for a handbook on cooperative curriculum research. Preparation of such a publication, however, will take considerable time. In the meantime, there are available many excellent magazine articles, pamphlets and books dealing with promising new developments in research and in research methodology.

The following carefully selected bibliography has been compiled in order to provide an immediate source of information and assistance to ASCD members. For convenience, the bibliography has been organized in three sections, the titles of which are self-explanatory.
