CURRENT PROJECTS

Effective Supervisors. A committee of researchers and practitioners will conduct studies to identify effective supervisory practices at district and building levels. The group will also analyze district staffing patterns and their effects. Project Chair: Robert Anderson, Texas Tech University, Lubbock.

Supervision and Leader Behavior Training. A committee of researchers and supervisors will design new two-day, four-day, and extended leadership training experiences to be offered as National Curriculum Studies Institutes and other ASCD activities. Project Chair: Ben Harris, University of Texas, Austin.

Commission on Instructional Supervision. Similar to the ASCD Curriculum Committee, which has met annually at recent Annual Conferences, this group of 75 persons will meet and exchange information at the 1984 and 1985 Annual Conferences. Between conferences, they will be encouraged to communicate with others working on common problems.

Redefining General Education in the American High School. ASCD will publish a report in the spring of 1984 on results of a network of 17 high schools across the U.S. that have been reconsidering the subjects required of all students and formulating their own locally developed conceptions of a general education curriculum. Project Director: Gordon Gavrelt, ASCD Executive Director.

High Schools for the Future. ASCD will bring together educational leaders who want to look at high schools for the future. The project will engage the local community of each network high school in a year-long study/analysis of the future role of the high school. Each school will be represented by a team of professionals who will meet with other network schools twice during 1983-84. Project Chair: Luther Kiser, Ames, Iowa, Community School District.

Elementary Network Planning. A group of elementary educators will help plan for a network of elementary schools to begin in 1984-85. Project Chair: Jean Marani, Florida Department of Elementary Education, Tallahassee.

Elementary Curriculum Trends. ASCD is initiating a survey of curriculum practices in U.S. elementary schools which will be conducted annually to monitor and report trends. Project Director: Jean Hall, ASCD Associate Director.

Policy Analysis. ASCD will convene qualified educators to analyze educational policies at local, state, and national levels. Project Director: Diane Bereth, ASCD Associate Director.

Equal Access to Microcomputers. A team of educators familiar with computer use in schools will gather data and issue a statement on the apparent growing disparity in access to computers between students who attend richer schools and those attending poorer ones. Project Chair: Gavin Brownlee, Educational Service Center, Richardson, Texas.

Teaching Thinking Skills. An ASCD committee will plan an invitational conference to be held in May 1984 at which researchers and practicing educators will assess the state of professional knowledge on teaching higher-order thinking in elementary and secondary schools. Following the conference, committee members will advise ASCD officials and staff on future direction of ASCD activities in this area. Project Chair: Stuart Rankin, Detroit Public Schools.

RECENT PRODUCTS

Books

Effective Schools and Classrooms: A Research-Based Perspective. David A. Squires, William G. Huitt, and John K. Segars includes case studies of school improvement and a self-assessment questionnaire. (611-83298) $7.50.

Successful Teacher Evaluation. Thomas L. McGreal. Describes eight characteristics of teacher evaluation systems that work (611-83300) $8.75.
