DR. GENE R. CARTER • CREATING SOLUTIONS: THE ASCD
REVOLUTION IN MOTION

For 69 years, ASCD has espoused a forward vision. Year after year, we stand by your side as you empower the next generation of learners to reach for and pave the way toward a brighter future.

And at the heart of your work—*and ours*—are the students.

A global education leadership organization, ASCD believes that

- Each child deserves a personalized, world-class learning experience.
- Each student has the right to be healthy, safe, engaged, supported, and challenged.
- All kids must receive a well-rounded education, one that goes well beyond reading and math.
- All learners should graduate college, career, and citizenship ready.
- Each student should be taught by an educator engaged in ongoing professional development.
- A child is so much more than a test score.

Join our efforts to ensure that each child, regardless of background, socioeconomic status, or geographic location has the opportunity to not only learn, but also excel.
