## *ASCD Assists Educators in Common Core State Standards Implementation*

In 2010, ASCD became an endorsing partner of the Common Core State Standards. ASCD believes the newer, higher standards will require schools and communities to better and more comprehensively support student learning if students are to meet these enhanced expectations.

For the Common Core standards to succeed and have maximum effect, they also need to be part of a well-rounded, whole child approach to education that ensures students are healthy, safe, engaged, supported, and challenged.

ASCD has become a true leader in providing educators with the resources they need for the implementation of the Common Core State Standards. In 2013, this included books, videos, institutes, webinars, newsletters, and the web site EduCore.

As the states implement Common Core, ASCD is committed to providing educators with the tools and resources they need to support student success.
