## *Whole Child Virtual Conference*

In 2013, ASCD's Whole Child Virtual Conference grew in both audience and stature. More than 1,000 people from 51 different countries attended the six-day event.

Sessions were led by education thought leaders, experts, and prominent ASCD authors.

The Whole Child Virtual Conference provided educators a high-quality, practical way to learn about the whole child philosophy.

This event positioned ASCD as the global education leader and enabled us to share the message that each child in each school should be healthy, safe, engaged, supported, and challenged.
